Plumen 002 CFL B22 BAYONET  
available ONLY

## Product short description:

BAYONET available ONLY

The Plumen bulb is the first energy-efficient design. The dynamic form and "sculpted" contrasts with the current forms of energy lamps making it unique.

## Product description:

BAYONET available ONLY.....

The Original Plumen 002 uses a unique bulb design to bring style and warmth to any space. At first glance the form is minimal, but on further inspection the sweeping shape reveals light gradations that are essential to the subtle glow it produces.

The 002 works beautifully in series or alone, whether in a pendant, table light or wall sconce. Low brightness means the cozy, intimate light requires no shading.

Created as an efficient and cost effective alternative to Squirrel Cage filament bulbs, it's perfect for any space where you might otherwise use an incandescent bulb. The Original Plumen 002, just like the 001, uses 80% less energy than a regular bulb and will last 8 times longer. Another designer light bulb from Plumen that is efficient, beautiful and affordable.

Plumen bulb works like all other energy saving lamps saving up to 80% energy compared to a traditional light bulb but is more durable, 8.000 hours!

6watt, 254 lumen, equivalent to a 25watt incandecent bulb.

WEIGHT 0.4 kg DIMENSIONS Length 163cm Width 65mm

Bayonet only
