LED XXL Transparent Light Bulb
Globe G155 Long Filament 7W E27
Dimmable 2200K

Product short description:

LED Transparent XXL Light Bulb Globe G155 Long Filament 7W dimmable is the new standar of giant light bulbs. We have worked hard to improve one of the best-selling products of our catalogue: we replaced the carbon filament with a curved LED filament which assures the same allure but with a consumption of only 7W and greater brightness (580 lumen). We chose a dimmable version, which allows you to adjust the intensity and create different atmospheres. E27 fitting makes them compatible with all of our pendant lamps. The result is a striking bulb that is both beautiful and functional.

ATTENTION: to properly dim an LED bulb, a specific dimmer or the latest generation of universal dimmers is required. You will find a specific section on our website with a selection of both wall and in-line models.

Product description:

Light bulb type: LED
 Shape: G155
 Fitting: E27
 Diameter: 155 mm
 Height: 195 mm
 Volt: 220/240
 Watt: 7W
 Energy efficiency class: A+
 Colour temperature: 2200 K
 Lumen: 580 Lm
 Adjustment: dimmable

Our bulbs with straight filament can work with all DIMMERS (TRIAC or IGBT), while for curved filament bulbs, IGBT dimming is highly recommended.

For the choice of the dimmer: in addition to the maximum power of the user, the minimum power must also be considered, because when the regulated power is lower than the minimum rating, the user can "flicker" and / or be damaged.
